

Paired-Topic Phrase Map of AhR Research

Title-and-abstract phrase co-occurrence map showing the major topics most often paired with AhR

How to read this map

Node size: number of papers carrying the retained phrase

Node color: thematic cluster from Louvain community detection

Edge width: co-occurrence strength between retained phrases within the same paper

257 papers 449 papers 1249 papers

Thematic clusters

Cluster 1: CYP1 toxicology and carcinogenesis

metabolism, cancer, CYP1A1, dioxin / TCDD, cytochrome P450

Cluster 2: Microbiome and gut barrier biology

inflammation, gut, microbiome, tryptophan metabolism, indoles

Cluster 3: Tryptophan-kynurenine immunometabolism

kynurenine pathway, Treg cells, IDO1, immune regulation, Th17 cells
