

Document Landscape of AhR Research Themes

Each point is one paper positioned in 2D concept space; colored islands summarize the major thematic clusters.

How to read this map

- Each point: one paper
- Color and island envelope: thematic cluster
- Distances: qualitative similarity in concept-profile space

Cluster summaries

- Cluster 1:** Environmental toxicology and liver response
3,464 papers | median year 2013
- Cluster 2:** Cancer and hormone signaling
1,039 papers | median year 2018
- Cluster 7:** ARNT-CYP1 transcriptional response
976 papers | median year 2008
- Cluster 5:** CYP1 enzyme induction and toxicology
884 papers | median year 2008
- Cluster 4:** T cell and cytokine regulation
874 papers | median year 2020
- Cluster 3:** Immune-microbiome signaling
803 papers | median year 2022
- Cluster 6:** CYP1 toxicology and carcinogenesis
251 papers | median year 2011
