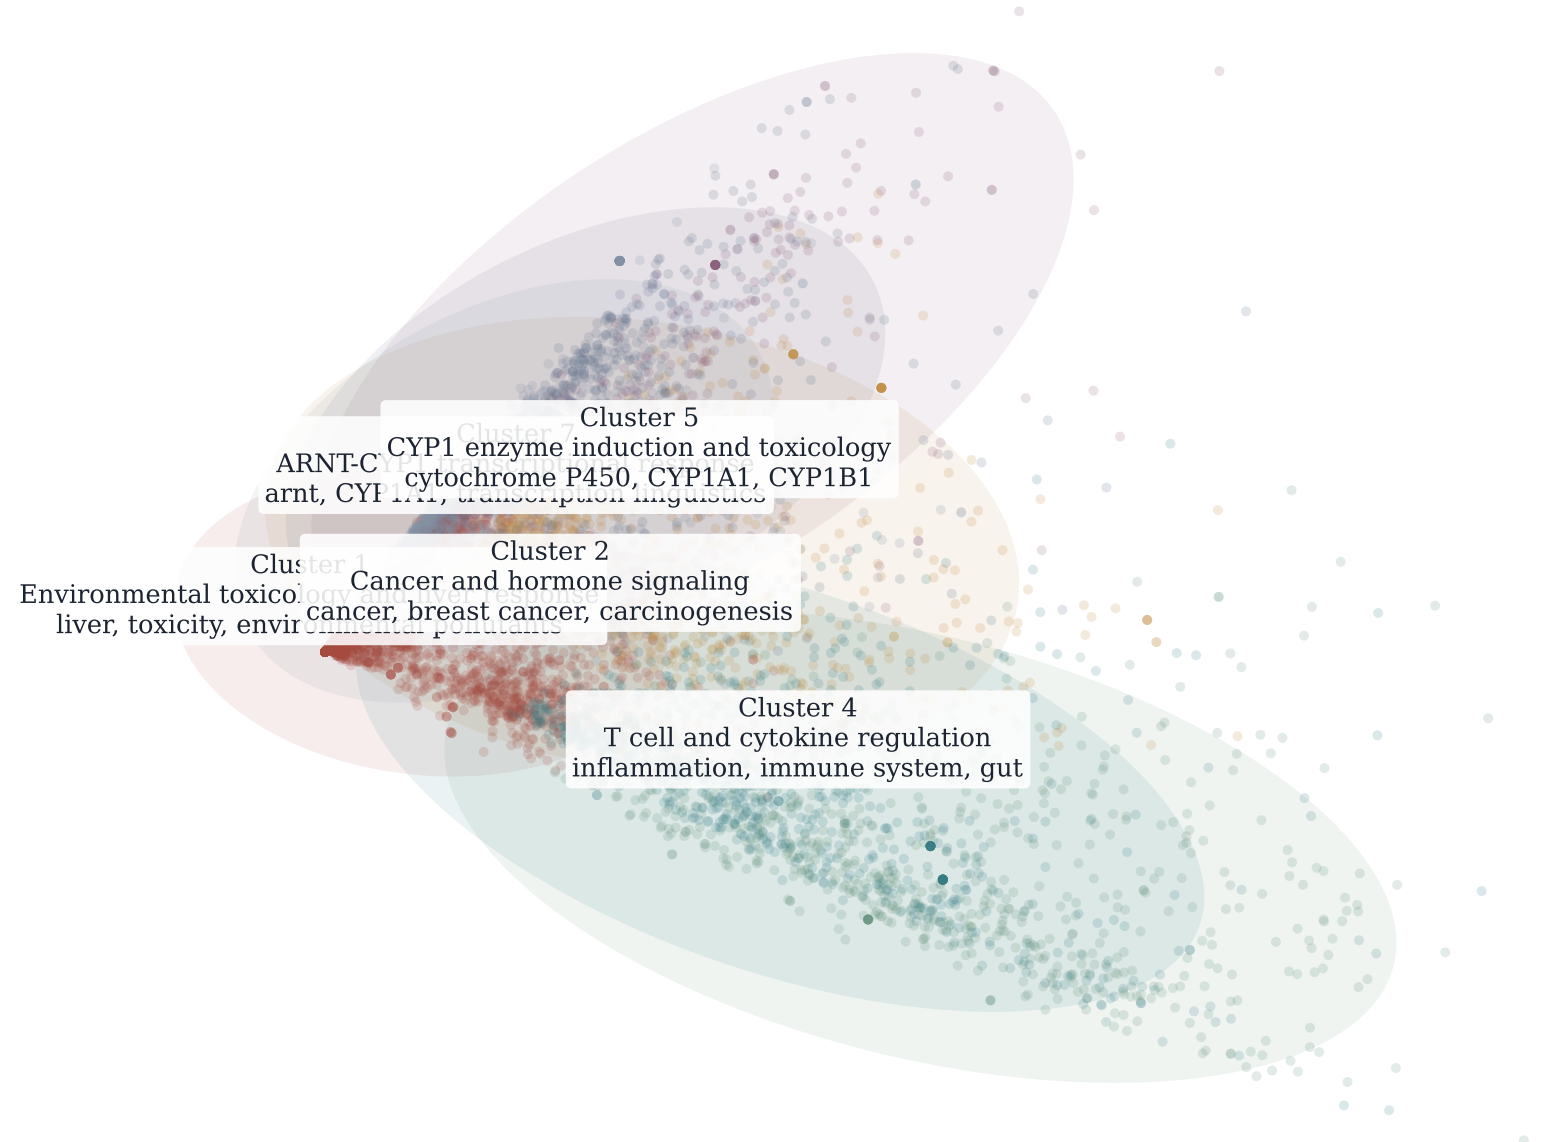
Document Landscape of AhR Research Themes

Each point is one paper positioned in 2D concept space; colored islands summarize the major thematic clusters.



How to read this map

Each point: one paper

Color and island envelope: thematic cluster

Distances: qualitative similarity in concept-profile space

Cluster summaries

- Cluster 1: Environmental toxicology and liver response
  3,464 papers | median year 2013
- Cluster 2: Cancer and hormone signaling
  1,039 papers | median year 2018
- Cluster 7: ARNT-CYP1 transcriptional response
  976 papers | median year 2008
- Cluster 5: CYP1 enzyme induction and toxicology
  884 papers | median year 2008
- Cluster 4: T cell and cytokine regulation
  874 papers | median year 2020
- Cluster 3: Immune-microbiome signaling
  803 papers | median year 2022
- Cluster 6: CYP1 toxicology and carcinogenesis
  251 papers | median year 2011
